Subject index

1 : 1 educational computing, 181

Activity Theory, 430
annotation use, 28
anonymity, 281
assessment, 190

blended environments, 239
blended learning, 396

case study, 118
case-based learning, 239
CD-ROM, 17
classical test theory, 419
classroom research, 190
cliques, 440
cognitive strategies, 39
collaboration, 79, 118, 143
collaborative learning, 171
commodity hardware, 229
common ground, 79
communication, 143
complexity, 440
computer, 143
computer attitude scale, 330
computer conferencing, 118
computer experience, 330
computer science freshmen, 330
computer supported cooperative learning, 204
computer supported cooperative play, 204
computer technology acceptance, 387
computer-assisted assessment, 419
computer-mediated communication, 281
conference, 317
conferencing, 343
conservation laws, 143
context-aware, 229
control group, 17
coordination and support of TML, 269
course construction, 440
courseware, 366
CSCL, 39, 79

design, 143
design research, 292
diagnostic analysis, 419
digital classroom environment, 181
distributed, 229
distributed cognition, 79
domain knowledge, 53

E-learning, 204, 253, 303
e-mail, 217
ease of use, 387
effectiveness, 65
electronic voting system, 260
empirical, 405
engagement, 260
evaluating e-learning, 396
evaluation, 343, 430
evaluative standards, 374
experiment, 17
foreign language learning, 217

gender, 1
gender differences, 330
group, 143
group awareness, 281
group interviews, 102
group meaning, 79

Hamiltonian paths, 440
hand-held computers, 162, 171
Higher Education, 430
hypermedia, 28
hypermedia learning, 53

ICT, 102
ICT use, 1, 130
ICT-related pedagogical content knowledge, 292
illuminative, 143
incentive mechanisms, 355
individual, 143, 217
individual differences, 53, 405
information and communication technologies (ICT), 396
information commitments, 374
information searching strategy, 374
inquiry learning, 39
instructional systems design, 292
interactive, 91
interactive learning environment, 181
interactive technology, 317
interactive whiteboards, 102
interactivity, 260
interoperability standards, 366
interview, 253
IT-use, 343
item response theory, 419

kindergarten, 17
knowledge building, 317
knowledge sharing, 269
knowledge-based, 143

L2 reading, 28
learner control, 65
learning design, 355
learning networks, 355
learning objects, 366, 440
learning organiser, 162
lectures, 260
LISREL analysis, 374

m-learning, 229
mathematical, 440
mathematics, 143
metadata, 440
mobile & wireless games, 204
mobile learning, 162, 181, 204
mobile phones, 217
mobile technology, 317
modelling, 143
multi-modal, 229
multimedia, 17, 217

NP-complete, 440

one-dimensional collisions, 143
online education, 343
online forum, 130
online learning, 396
online learning environment survey (OLES), 396
online learning environments, 396
online resources, 239
online synchronous discussion, 303
order, 317

participation, 355
pedagogical agents, 405
pedagogical content knowledge, 292
phonological awareness, 17
portraits, 281
positioning systems, 204
primary, 91
primary and secondary education, 1
primary schools, 102
programming, 143
propensity to innovate in TML, 269

qualitative variation, 239
qualitative, 143
quantitative, 217
questioning skills, 303
questionnaire, 374

race/ethnicity, 1
real-time, 229
reconfigurability, 440
reflective observation, 130
relation oriented, 405
requirements analysis, 190
resource-based learning, 366
reusable, 440

satisfaction, 253
science learning, 190
second language learning, 17
secondary school students, 405
secondary, 91, 143
self-regulation, 39
semantic Web, 440
sensing, 229
sequence, 317
SIDE-model, 281
social categorization, 281
social class, 1
social dilemma, 281
social identity theory, 281
social value orientation, 281
special education, 118
strictly task-oriented, 405
student attitudes to ICT, 130
student learning research, 239
student teacher, 387
student teachers, 130
students' views, 102
subjective norm, 387
survey, 330
system architecture, 229
system experience, 53

teacher education, 118
teacher preparation, 292
teacher training, 171
teachers, 91
technology acceptance model, 387
technology, 91
technology-mediated learning (TML), 269
technology-mediated virtual learning environment (TVLE), 65

undergraduate, 217
undergraduate student, 162
usefulness, 387

video, 217
virtual characters, 405
virtual learning environments, 253

wearable computing, 229
Web-based learning, 374
wireless networks, 171
wireless technologies, 181
World Wide Web, 217
